

12” Subsea Pipeline Sleeving Repair

Beta Offshore Production Complex, Long Beach, California

Client: Beta Offshore

Beta Offshore evaluated options to repair their subsea gross fluids pipeline running from Platform Eureka to Platform Elly.

DPSI’s scope of work included:

- Preparation of economic analyses of repair options with considerations for lifetime, installation / cost risks, schedule risks, flow capabilities, and payout based on projected (increasing) production quantities
- Management of efforts of environmental permitting consultant and the structural engineer, as well as snubbing, diving/marine, and topside modification contractors
- Developed and submitted a complete BOEMRE permit application package
- Compiled overall project execution plan by integrating components from all sub consultants and contractors
