

## **Platforms A, B, and Hillhouse Pipeline Replacement Project**

**Ventura, California  
Client: DCOR, LLC**

DCOR, LLC (DCOR) is replacing five subsea pipeline segments within the Dos Cuadras Offshore Production Unit, at Platforms A, B, and Hillhouse. This project will use a dynamically-positioned (DP) reeled pipelay vessel brought in from the Gulf of Mexico.

This project is a replacement-in-kind in order to improve the safety and reliability of the subsea pipeline.

DPSI is the engineer of record for the subsea pipeline replacement project, and was responsible for preparing the technical submittal for permitting to the Bureau of Ocean Energy Management, Regulation and Enforcement (BOEMRE) on Behalf of DCOR.

Installation is planned for Fall 2011.
